# Enrollment in Houston-Region Schools, 2017-2023

A February 2024 analysis of publicly available Texas Academic Performance Reports (TAPR) data for the 2022-2023 school year

#### **Key Findings**

- Eleven Houston-region ISDs have seen steady enrollment declines since 2017, with their collective enrollment falling by nearly 48,000 students.
- At the same time, large charter networks such as Harmony, KIPP, and YES Prep added more than 25,000 students at their Houston-region campuses.
- The proportion of emergent bilingual (EB) students in Houston-region ISDs increased steadily since 2017, with several districts seeing double-digit gains.
  - These students often require additional supports and resources from school systems to overcome the language and other socioeconomic barriers they face to be set up for academic success.

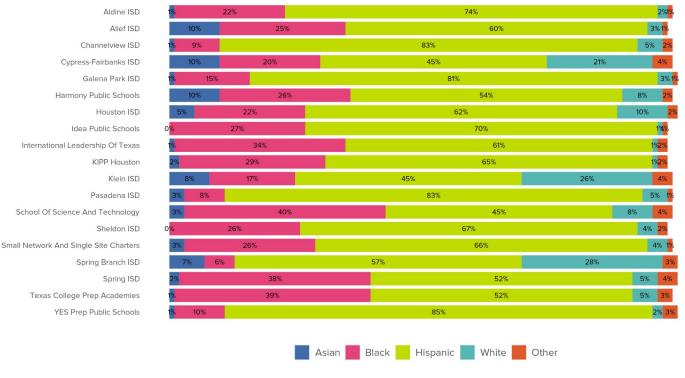

# Collectively, Houston-region ISDs had nearly 48,000 fewer students enrolled in 2023 than 2017. Large charter networks added more than 25,000 students at their Houston-region campuses.

	Total	Enrollment	% Enrollment						
	Enrollment,	Change,	Change,						
District	2017	2018	2019	2020	2021	2022	2023	2017-2023	2017-2023

Houston Region Total	716,407	716,607	712,309	718,884	694,166	693,212	695,148	-21,259	-3%

#### Hispanic students are the largest group in Houston schools, representing over 60% of all students, followed by Black students at 20%.

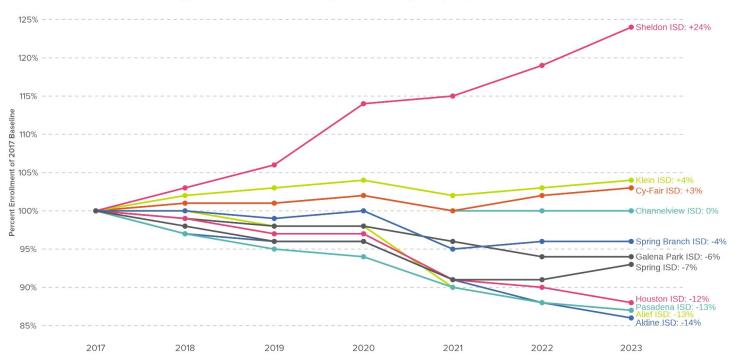

## Enrollment at many Houston-region ISDs fell from 2017 to 2023. Only Cy-Fair, Klein, and Sheldon ISDs' enrollment grew over that time period.

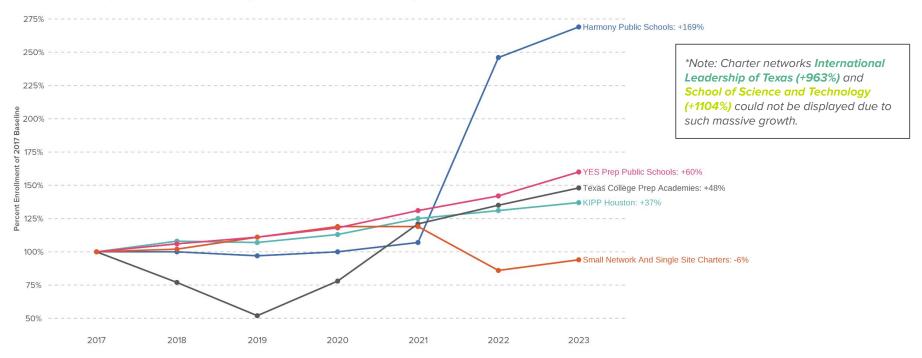

Enrollment Change Relative to 2017 Baseline, Houston-Regions ISDs Collectively, enrollment at Houston-Region ISDs fell by nearly 48,000 students since 2017.

## At the same time, large charter networks saw significant growth from 2017 to 2023, adding more than 25,000 students at Houston-region campuses.\*

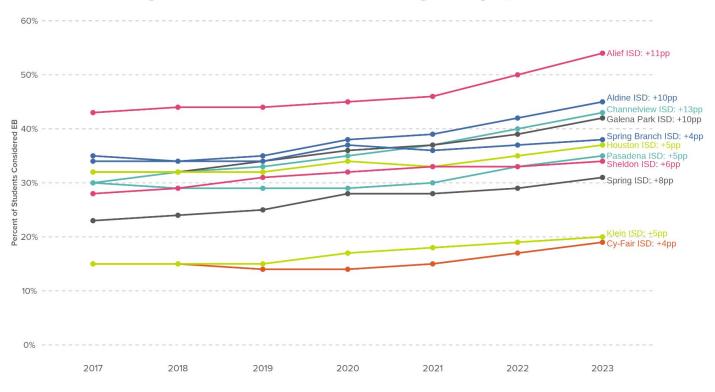

Enrollment Change Relative to 2017 Baseline, Houston-Region Charter Schools Meanwhile, enrollment at Houston-Region charter schools increased by more than 25,000 students since 2017.

## Houston-region ISDs have seen a steady increase in the proportion of emergent bilingual (EB) students since 2017.

Change in Percent of Students Considered Emergent Bilingual, 2017-2023

#### Implications and Takeaways

- School funding in Texas is based on student attendance, which is also tied to enrollment. As enrollment continues to decline in Houston-region ISDs, this has significant implications for budgeting and resource distribution.
- Large, statewide charter networks showed substantial enrollment growth at their
  Houston-region campuses from 2017 to 2023, indicating that families are increasingly
  exploring their options as they seek the best fit environment for their children.
- At the same time that overall enrollment has fallen in Houston-region ISDs, the
  proportion of students considered emergent bilingual (EB) has steadily increased.
  Supporting EB students often requires specialized training for educators and additional
  programming, which may affect decisions around staffing and resource allocation.
