

SCHOOLS THAT INSPIRE KUJAWA PRIMARY

WHAT WE LOVE

Kujawa Primary, a well-established institution since 2007, is an IB Primary Years Programme Title 1 School in Aldine ISD. It serves Pre-K and Kindergarten students, using high-quality curriculum, such as Core Knowledge Language Arts (CKLA) Pre-K, Frog Street, and SEL curricula in its age-four classrooms. The campus leadership utilizes knowledge building curriculum to foster global learners who are caring, critical thinking problem solvers. During our visit, children actively engaged with rich, coherent content, fostering curiosity and their voices.

BY THE NUMBERS

Kujawa Primary serves **640+** students aged 3 to 5 in over **35** classrooms, including Spanish-English and Vietnamese-English bilingual classes and special education. With a **60%** bilingual rate, Kujawa Primary emphasizes linguistic diversity and inclusive education.

INSIGHTS INTO INSPIRATION

Attracting and Developing Talent

Since one cannot pour from an empty cup, Kujawa Primary underscores **the importance of teachers continuously expanding their knowledge to provide enriching student experiences**. Their extensive partnership with the International Baccalaureate program ensures teachers not only benefit from knowledge-rich curricula like Amplify CKLA at the district level and receive additional training through the IB program. We also appreciated Assistant Principal Ms. Marquez's thoughtful request for feedback during the tour, demonstrating a curiosity-driven and growth-oriented mindset at the leadership level, which we aim to foster in the children we serve.

Play: Learning to Love Learning

Student ambassadors, aged six, led the first part of our tour and were eager to share the Oral Language Lab—a museum-like set of curated stations connected to literature—and the library. **The coherence of knowledge-building was striking**; posters of plants, drawings, and student-nurtured seedlings were everywhere, adding to the fun atmosphere. Children actively participated in discussions at various centers or with teachers, displaying a welcoming attitude as they proudly showcased their work to us as visitors.

Strong Academic Foundations

Knowledge-building is fundamental at Kujawa Primary. Through Amplify CKLA Pre-K, content walls, displayed vocabulary, and examples of student work related to various subjects, it's clear that children are learning about their world and expanding their vocabulary while engaging in discussions. This knowledge is shared systematically through the IB transdisciplinary thematic units of inquiry, which explore topics like "Sharing our Planet."
